- Learning to work with cloud platforms such as Firebase Hosting, understanding basic infrastructure and deployment processes.
- Set up a CDN using caching techniques and secure data transfer to maximize content delivery, improve speed, and less latency
- Implemented Amazon EKS to deploy and manage containerized applications, ensuring scalability, security, and high availability.

FEB -> 2025- Present

PROFILE

A Detail Oriented Computer Science Graduate From Cavite State University with skills in Deploying the appropriate IT Solution to solve Problems.

WORK EXPERIENCE

Mad Gaming Development

Junior Mobile Developer

NOV - 2023 - JUNE - 2024

- Made apps for work and clients with Android Java.
- Created and built UI/UX parts like game images, ad banners, and project images with photo and video software.
- Added outside APIs and in-app data tracking to make the app work better and improve how users feel.
- Built home pages using HTML, CSS, and JavaScript, and put them on Firebase.
- Deployed in different app shops like Google Play Store, Amazon Appstore, Samsung Galaxy Store, Xiaomi Appstore, APK Pure, and Uptodown.

Valenin IT Solution and Services

Web Developer Internship

SEP -> 2024 - JAN-2025

- Developed and implemented website modules using Laravel 11 and Vue 3 VILT Stack.
- Utilized Jira for efficient project monitoring and ticket management.
- Managed source code repositories with Git, Bitbucket, and GitHub, ensuring smooth version control, Damage Control and collaboration.

CAPSTONE

Gym Management System for Pound for Pound Fitness Gym

- Made tools that hint at custom workouts and good food plans for each user's body goals and data. Used Bootstrap and AdminLTE to shape a flexible UI look. Put in work for both server-side and client-side parts with PHP, JavaScript, and Ajax for live action. Kept user log-ins and data safe. Gave help to both backend (database and key parts) and frontend (UI/UX change and responsiveness).

OJT TRAINING

Melham construction corporation

Role: Backend Developer (OJT)

- Continued development and enhancement of a Task Monitoring system using Codelgniter 4
- Developed backend functionalities to support the frontend visuals.
- Contributed to the creation of frontend tasks
